

COMPLEX MEASURING TASKS BROUGHT STRAIGHT TO THE POINT. **MILLIMAR**

The latest information on MILLIMAR products can be found on our website:

www.mahr.de/en/Home, WebCode 20515

► | The requirements for electrical length measuring instruments are almost as broad as their scope of application. Reliability, precision as well as simple operation are the major demands, Millimar compact and column measuring instruments fulfill all these demands and requirements.

Millimar probes are the most influential components of a measurement chain. Their characteristics determine the quality of the entire measurement; depending upon the type of application we have the corresponding probe for your requirements. For example; a Millimar Inductive Probe: robust, versatile and has an attractive price, or a Millimar Incremental Probe which is ideal over a large measuring range and has a small linearity error over the entire measuring range.

Millimar. Electrical Length Measuring Instruments

OVERVIEW

Evaluation Instruments

C 1200

C 1245

S 1840

- Compact, handy and simple to operate
- Extremely precise and easy to read due to the large clearly defined analog or digital display
- Single, sum and differential measurement; limit switches and extreme value memories
- Highly accurate, long term stability and insensitive to environmental influences
- Good zero stability even when changing the measuring range
- Short response time ideal for assessment of fast processes
- Analog or digital display
- Connect to a controller or a computer via the digital output
- Analog output (optional)

Inductive Probes

- Large linearity range, strong output signal and insensitive to interference
- Precise measuring spindle and lever, frictionless ball or spring bearing for the highest resolution with the lowest hysteresis
- Cable is plugged into the probe allowing quick and simple maintenance (P1300)
- Robust construction for use on the shop floor; further models for all applications are available.

P1300 M

P2004 M

Millimar. Electrical Length Measuring Instruments

APPLICATIONS WITH INDUCTIVE PROBES

Single measurement with one probe

Indicating instrument instantly displays the measured value.

- Used for all kinds of direct measurements on cylindrical and flat work pieces
- Applied in the same way as with digital / dial indicators, digital / dial comparators or test indicators

Thickness measurement

Radial run-out

Axial run-out

Sum measurement with 2 probes

Indicates the sum of deviation (total composite error) acquired from 2 probes irrespective of the form, support and concentricity deviation.

Thickness measurement

Difference measurement with 2 probes

Shows the difference between the measured values acquired by 2 probes irrespective of the absolute dimension of the test piece. This is particularly suitable for dimensional comparison of two test points.

Form measurement of wedges, cones

Height difference between 2 steps

Perpendicularity measurement

Concentricity measurement on 2 shaft diameters

Millimar. Electrical Length Measuring Instruments

INDUCTIVE PROBE PROGRAM

P1300-Series (Mahr-Half bridge)

P1300 A

P1300 B

- Available in Mahr and Tesa compatibilities
- Well-proven and established Mahr-Half Bridge technology
- Easy to service: cable and probe can be separated via the plug-in connector
- Simple to change to pneumatic lifting
- Measuring spindle runs in rotary stroke bearings

Page 7-6

P2000-Series

P2001

P2004

P2101 A

P2104 A

- Available in all prominent compatibilities (Mahr, Mahr-Federal, Tesa, Marposs)
- Wide product spectrum; measuring ranges from 1 to 10 mm plus models with a compressed air (pneumatic) lifter or with vacuum retraction
- With rotary stroke bearings (except P2001)
- High linearity over the total measuring range
- Excellent electromagnetic shielding (EMC)
- All probes (except P2001) can be easily converted from axial to radial by mounting a slip on cap, included in the scope of supply

Page 7-10

1301 / 1303 / 1304 K / 1318 (Mahr-LVDT) / EHE-Series (Federal-LVDT)

1301

1303

1304 K

1318

EHE-2056

- Extremely robust in all operating conditions; measuring system is offset to guide and mounting shank
- Excellent clamping characteristics
- Measuring spindle runs in rotary stroke bearings (except 1318)
- Measuring spindle can be lifted with a cable release (1301/1303)
- Gaging pressure is less than 4g / .14 oz in either direction, with a change of less than 0.1 g per 25 μm / .0001" of contact travel and linearity of 0.1% over the full range $\pm 0.250 \text{ mm} \pm .010''$, also clutch-mounted contact swivels through 280° arc for easy positioning (EHE-Series)

Page 7-14 / 7-16

1340 Mahr High Precision Probe

1340

- To obtain the best results use in conjunction with Millitron 1240
- Unprecedented measuring accuracy and minimum linearity error < 0.01 %, i.e. 0.4 μm over the total measuring range

Page 7-14

General Technical Data of Inductive Probes

The measuring principle of inductive probes is based on the change of position of the magnets conductive core moving within a coil system, generally this is distinguished between a half bridge and LVDT's.

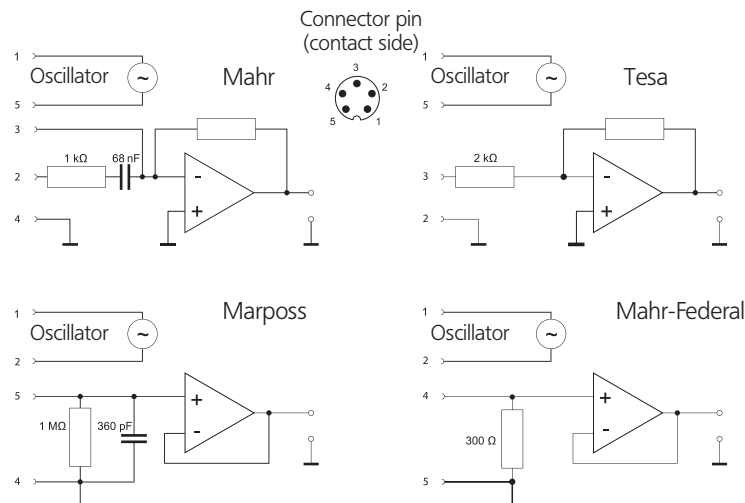

The Mahr P2000 series of probes applies a high linear, patented VLDT transducer which is similar to an LVDT transducer. This also operates according to a differential transformer principle.

Electrical specification of various compatibilities

		Type	Mahr	Tesa	Marposs	Mahr-Federal
Carrier frequency	KHz		19.4	13	7.5	5
Sensitivity	mV/V/mm	P2001 P2004 P2104	192	73.75	115	78.74
		P1300	192	73.75	—	—
		1301 1303 1304 K 1318	192	—	—	—
		P2010	19.2	29.5	11.5	7.874
Amplitude	Veff		5	3	3.5	2

Schematic drawings of Mahr input amplifiers according to the various compatibilities

Millimar. The Plug and Play Probe

THE INDUCTIVE PROBE MILLIMAR P1300

► | The Plug and Play Probe: Cable and probe can be separated with the plug-in connector. High linearity due to sensitivity compensation in the probe. I ◀

High linearity due to the probe being able to compensate sensitivity.

Pneumatic Lifter can be fitted to any standard probe (with standard accessories). Simply fasten and unfasten an air hose.

Rotary stroke bearings thus insensitive to lateral forces acting upon the spindle

Especially suited for use in critical manufacturing environments. Probe and cable connector are water proof **IP64** according to IEC 60529

Sealing bellow is made from Viton which has a **excellent chemical resistance**.

Code Initial	IP	International Protection
First Numeral	6	Dust-tight
Second Numeral	4	Protected against splash water from all directions

Extremely easy to service

Cable and probe can be separated via the plug-in connector.

Advantages of a probe with a plug-in connector:

Service incident	P1300	Standard Probe
Cable break 	<p>Only the cable has to be replaced.</p> <p>Advantage:</p> <ul style="list-style-type: none"> a) Shorter downtime of manufacturing equipment as the probe does not need to be newly installed and adjusted. b) Inexpensive, as only the cable has to be replaced and not the complete probe. 	<p>The complete probe must be removed from the fixture and replaced.</p> <p>Disadvantage:</p> <ul style="list-style-type: none"> a) Longer downtime as the probe must be newly installed, set-up and adjusted. b) Expensive as the complete probe must be replaced.
Defective probe e.g. collision with workpiece 	<p>Only the probe has to be replaced.</p> <p>Advantage:</p> <p>The cable does not need to be removed from the cable guide or the cable harness</p>	<p>The complete probe including the cable must be replaced.</p> <p>Disadvantage:</p> <p>The cable must be dismounted from the cable guide or the cable harness.</p>

Inductive Probe Millimar P1300 M / T Half Bridge

Features

- Supplied with:
Inductive Probe P1300
Connection cable 2.5 m
Screwed sealing plug
Hose connector for
compressed air
Open-ended spanner
Operating instructions

Cable and probe can be separated with the plug-in connector.

Technical Data

Lever Type Gage Heads

F

EHE-2056

Features

- Clutch-mounted contact swivels through 280° arc for easy positioning
- Linearity – 0.1% over full range of ± 0.250 mm / ± 0.010 "
- Gaging pressure less than 4 g / .14 oz. in either direction, with a change of less than 0.1 gram per 25 μ m / .001" of contact travel.
- Repeatability better than 0.1 μ m / 4 μ in
- Cable length – 1.2 m / 4 ft

For use on test stands, surface plate work, or where light pressure is needed.

Automatic Cosine Error Compensation

Angle "A"	Correction Factor
10	.985
20	.940
30	.866
40	.766
50	.643
60	.500

Involute tip (normally furnished) automatically corrects for cosine error when finger is at an angle up to 20°. Simplifies "reach over" jobs.

When exceeding 20°, use ball tip contact and table above. With multiplier function, 832F & 1840F Amplifiers can correct for cosine error.

Accessories

Adaptor to mount EHE-2048 on Model 2400 Stand

Clamp for mounting EHE-2048 on model 2300 Stand

Accessories kit for EHE-2048. Includes EAM-1071, CP-116, EPT-1013, two rectangular holding bars and a holding rod

Replacement tip, 1.6 mm/ .062" dia. steel ball

Replacement tip, 0.787 mm/ .031" dia. tungsten carbide ball

Replacement tip, steel involute (normally furnished)

Replacement tip, 0.787 mm/ .031" steel ball

Replacement tip, 1.6 mm/ .062" dia., sapphire ball, 1:1 ratio

Replacement tip, 1.6 mm/ .062" dia., sapphire ball, 2:1 ratio

Replacement tip, 1.6 mm/ .062" dia., sapphire ball, 3:1 ratio

Replacement tip, 1.6 mm/ .062" dia., sapphire ball, 4:1 ratio

Replacement tip, 1.6 mm/ .062" dia., sapphire ball, 5:1 ratio

Replacement adjustable nose mounting bracket

Replacement fixed back plate mounting bracket

F

Models and Accessories

Model EHE-2048 – Post Bracket Back, (BK-108) tamper-proof mounted. Option: Conversion Bracket, EAM-1071 (sold separately), attaches quickly and securely in any rotational direction to suit a wide variety of mounting needs.

Model EHE-2056 – Adjustable Nose Mount (EAT-1010), tamper-proof mounted. Permits wide choice of positions and approximately 3.8 mm / .150" fine adjustment for quick setup with support close to gaging contact.

Model EAT-1026 – Fine Adjust Attachment for Lever Type Gage Heads with post mounting option, permits mounting on a wide variety of fixtures.

Model EHE-2050 – Fixed Nose Mount (EAM-1045), tamper-proof mounted. Provides support close to gaging contact for the most critical applications.

Model EAS-1333 – Mounting Kit for use with EHE-2048. Permits Gage Head to be mounted on a wide variety of stands and holding fixtures. Includes Conversion Bracket, EAM-1071 and 0.787 mm / .031" diameter ball tip contact.

Model EHE-2052 – Fixed Back Plate, (EPL-1140) tamper-proof mounted. For mounting on adjustable plates or slides in fixtures for continuous duty application.

Spring (Pantograph) Type Gage Heads

F

Features

- Friction-free, straight line motion.
- Repeatability better than $0.01 \mu\text{m} / .5 \mu\text{in}$
- Linearity – 0.05% over full range of $\pm 0.250 \text{ mm} / \pm 0.010''$, with repeat accuracy within $0.01 \mu\text{m} / .5 \mu\text{in}$.
- Adjustable pretravel.
- Gaging pressure provided by external spring, from 85 g / 3oz. to 400 g / 14 oz.
- Uses regular 4-48 threaded Contact Points (PT-223 normally furnished).
- Cable length – 2.4 m / 8 ft.

Rugged and reliable, ideal for fixtures or automatic gages

Technical Data

Model EHE-2053

Fixed Back Plate EPL-1140 (15.8 mm / 0.625" wide), tamper-proof mounted. Provides means of attachment for mounting on adjustable plates or slides in fixtures for continuous duty application.

Model EHE-2049

Pressure Spring mount, tamper-proof mounted. Permits setting pre-travel and provides ample gaging pressure regardless of Gage Head position.

Model EGH-2011

Protective Housing encloses head in tamper-proof mounting. Permits adjustment of both gaging pressure (from 3 to 14 oz.) and pre-travel.

Model EGH-2006

Housing is extended and equipped with heavy duty back plate forming suitable support for use with Model 700 Comparator Stand.

Gage Head Adaptor Cables

Order no.

Gage Head Adaptor Cables connects Mahr Federal EHE-2XXX and P2XXXXF gage heads to Mahr Federal series 432 and 230 amplifiers; 152 mm / 6" long

ECB-1852

Gage Head Adaptor Cables connects Mahr Federal EHE 1XXX gage heads to Mahr Federal series 832 and 830 amplifiers; 152 mm / 6"

ECB-1853

Adaptors for Cartridge Type Gauge Heads

F

AD-138

Electronic probe adaptor permits using cartridge type gage heads with any regular Mahr Federal indicator.

AT-29

* For .315"/8mm dia. gage heads, bushing BU-197 (not shown) is required.

** Gage Head Bracket AAD-168 also fits SE-73 Mounting Block (with adjustment knob in place of socket head adjustment screw)

AAD-66

"L" bracket used for mounting .375" diameter gage heads on comparator stands.

* For .315"/8 mm dia. gage heads, bushing BU-197 (no shown) is required.

AD-87

Split collar adaptor for mounting .375" dia. gage heads. For 1/2-32 taps use **V-892**

* For .375"/8mm dia. gage heads, bushing BU-197 (not shown) is required.

EAD-1029

Right angle adaptor for mounting .375" diameter cartridge gage heads on 36B series comparators.

* For .315"/8 mm dia. gage heads, bushing BU-197 (no shown) is required.

AAD-67

For .375" diameter stem, square bracket. 1/4-20 mounting thread.

* For .315"/8 mm dia. gage heads, bushing BU-197 (no shown) is required.

AAD-91

"T" bracket flange mounted, two 4.3 mm / .169" through holes. For .375" dia. gage heads.

Millimar C1200 Compact amplifier

M

Features

Functions:

- ON/OFF
- mm/inch
- Reversal of counting direction
- Measuring range switching
- TOL (enter tolerance limit values)
- PRESET (for entering a numerical value)
- Factor (adjustable)
- DATA (Data transmission)
- Can be operated with batteries or from the main power supply
- The C 1200 is fully portable when battery powered
- Compact housing
- Wall mounting is also possible
- Supplied with: Mains adaptor and operating instructions
- High resolution and high contrast color display
- The display can be continuously inclined for the ideal field of vision
- Simple to operate

Millitron 830 Gaging amplifier

F

Features

- Battery operates more than 8 hours under full load
- Choice of Power Modules for 120 or 240 VAC operation
- ± 2 volt analog output
- Conforms to CE Standards
- Dual input - for single or differential modes
- Normal/Reverse transducer setting
- Selectable ranges in either Inch or Metric units.
- Calibration adjustments for each input.
- Convenient, front-mounted controls.
- Tilt base provides stable support and easy adjustment for best viewing angle.
- The essential performer for today's slim budgets
- For appropriate inductive probes please refer to pages 7-6 to 7-18

Technical Data

Repeatability	to within 0.00005 mm / .000002" or 1/10 of a graduation, whichever is greater
Linearity	less than 4/5 of a scale division
Calibration	less than 4/5 of a scale division
Response Speed-Display	less than .5 seconds for 10% to 90% step follow
Response Time - Output	< 15 ms
Dimensions	approx. 165 mm / 6.5" h x 190 mm / 7.5" w x 148 mm / 5.8" d
Temperature at specified accuracy	20°C / 68°F $\pm 2^\circ\text{C}$
Operating temperature	5° to 45°C / 40° to 110°F, with a temperature coefficient of .02% change/°C x full scale range
Storage temperature	0° to 60°C / 32° to 140°F

Millitron 832 Digital Electronic Amplifier

Features

- Dynamics – simultaneously computes the minimum, maximum, T.I.R., nominal and actual gage head signal for dynamic measurement capability.
- Multi-Range – three selectable ranges in inch or metric units.
- Message Center – display provides a simple “menu-driven” setup procedure in English, French or Spanish.
- RS-232 Output – for communicating with Data Collection Devices.
- Two Gage Head Input – Independent reading or for providing the capability of “summing” for diameter reading, matching clearances, runout and parallelism.
- Angular units – selectable arc seconds or millirads for angular measurement applications (see Electronic Levels).
- User selectable password for full lockout capability or individual key lockout in both setup and gaging modes.

Millimar C 1208 Compact amplifier with background lit display

Features

- Favorites, frequently required functions can be assigned to the SELECT key
- Static measurements $\pm A$, $\pm B$ and all combinations
- Dynamic measurements: Max, Min, Max-Min, Max+Min, mean
- Auto-Detect-Mode, two measuring instruments can be connected (Probe, Plug Gage ...)
- Programmable via the integrated key pad or by RS232 interface in conjunction with the MS-Windows configuration Software

Display

- Background lit LCD-Display with an analog and a two line digital display
- 5 three color status lamps for warning and tolerances limits
- Up to 2 features can be simultaneously displayed

Connections

- 2 inputs for inductive probes (also compatible with probes from Mahr, Mahr-Federal)
- RS232 interface
- 3 digital inputs for measurement start, master measurement, send measured values, ...
- 3 digital outputs for GO, NO GO, rework, measuring time, ...
- Supplied with:
Operating instructions and a mains power supply plug

Technical Data

Display	Background LCD, 115 mm x 70 mm	Error limit	
Analog scale	Pointer, 61 graduations	- 10 x analog display	2.5%
Range and text display	7 digit LCD, 5 x 7 dot matrix, alpha-numeric	- Digital display	0.3% (min. 0.2 μm)
Measured value display	7 digit LCD, 7 segments	Temperature coefficient	0.005%/°C
Tolerance display	5 LEDs, 3 colors	Operating temperature	0°C ... 45°C / 32°F ... 113°F
Displayed ranges	$\pm 3, 10, 30, 100, 300, 1000, 3000, 10000 \mu\text{m}$ $\pm .0001; .0003; .001; .003;$ $.01; .03; .1; .3 \text{ inch};$ or tolerance related	Interfaces	
Meas. range inductive probe	4000 (± 2000) μm , resolution 0.1 μm $\pm .08''$, resolution $.000005''$	Computer, printer	RS232, 9 pin interface (PC-compatible assignment) 3 Opto-coupler-outputs, 2 24V, 100mA 3 Opto-coupler-inputs, 24V, 10mA

Millimar C 1216 Compact amplifier with background lit display

Features

- Favorites, frequently required functions can be assigned to the SELECT key
- Static measurements $\pm A$, $\pm B$ and all combinations
- Dynamic measurements: Max, Min, Max-Min, Max+Min, mean
- Auto-Detect-Mode, two measuring instruments can be connected (Probe, Plug Gage ...)
- Programmable via the integrated key pad or by RS232 interface in conjunction with the MS-Windows configuration Software

Display

- Background lit LCD-Display with an analog and a two line digital display
- 5 three color status lamps for warning and tolerances limits
- Up to 2 features can be simultaneously displayed
- Additional resolution $0.01 \mu\text{m}$ / $1 \mu\text{in}$ at measuring ranges $\pm .008''$

Connections

- 2 inputs for inductive probes (also compatible with probes from Mahr, Mahr-Federal)
- RS232 interface
- 3 digital inputs for measurement start, master measurement, send measured values, ...
- 3 digital outputs for GO, NO GO, rework, measuring time, ...
- Analog output
- Programable analog output voltage (max. $\pm 5\text{V}$)
- Supplied with:
Operating instructions and a mains power supply plug

Millimar C 1245 Compact amplifier

Features

Functions

- 16 characteristics can be defined
- With the formula editor (80 characters) the input channels C1 to C8 are mathematically linked with 4 basic arithmetical functions with factors and brackets
- Static measurements: current value, square root, arc tangent
- Dynamic measurements: Max, Min, Max-Min, Max+Min, mean,
- Statistical functions: n, x-bar, S, Xmax, Xmin, R
- Programmable via the integrated keypad or with MS-Windows configuration software via the RS232 interface
- Memory can store up to 500 measurements
- Measurement Start / Stop

Display

- Analog indicator instrument for display of measurement values

- Two-line LCD for measuring values and help texts
- 5 three color status lamps for warning and tolerance limits
- Up to 3 features can be simultaneously displayed

Connections

- 2 input modules can be inserted into base unit
- Following modules are available:
 - 4 inputs for Inductive Probes (Mahr, Mahr-Federal, Tesa compatibility)
- RS232 interface
- 1 Analog output
- 3 digital inputs for measurement start, master measurement / zeroize, send data
- 6 digital outputs for GO, NO GO, rework, ALL GO, measuring time, 4 classes
- Supplied with:
 - Operating instructions and a mains power supply plug

Technical Data

Display	analog indicator instrument. LCD 53 mm x 40 mm (2.087" x 1.585")	Error limits

Millimar C 1240 M Compact amplifier with background lit display

M

Features

- Favorites, frequently required functions can be assigned to the SELECT key
- Static measurements $\pm A$, $\pm B$ and all combinations
- Dynamic measurements: Max, Min, Max-Min, Max+Min, mean
- Auto-Detect-Mode, two measuring probes can be connected
- Programmable via the integrated key pad or by RS232 interface in conjunction with the MS-Windows configuration Software

Display

- Background lit LCD-Display with an analog and a two line digital display
- 5 three color status lamps for warning and tolerances limits
- Up to 2 features can be simultaneously displayed

- Additional resolution $0.01 \mu\text{m}$ / $1 \mu\text{in}$ at measuring ranges $\pm .008''$

Connections

- 2 inputs for inductive probes (only compatible with Mahr inductive probes)
- RS232 interface
- 3 digital inputs for measurement start, master measurement, send measured values, ...
- 3 digital outputs for GO, NO GO, rework, measuring time, ...
- Analog output
- Programmable analog output voltage (max. $\pm 5\text{V}$)
- Also compatible with Probe 1340, see page 7-14
- Supplied with:
Operating instructions and a mains power supply plug

Millimar S 1840 Compact column amplifier

Features

- Easy to read 3 color analog display
- Measurement in conjunction with inductive probes (e.g. Mahr P2004) or electronic plug gages etc
- Two inputs for inductive probes (compatible with probes from Mahr, Mahr-Federal)
- Extensive calculation of input signals: $\pm A$, $\pm B$ and all combinations
- Dynamic measurements: Max, Min, Max-Min, Max+Min, Mean
- Programmable either via the integrated keypad or the RS232 interface by means of MS-Windows configuration software
- Programmable warning and tolerance limits, exceeding the limit causes the color to change from green to yellow to red
- Background lit 2 lined LCD to display measured values, help text and measuring units
- Analog output
- 3 digital inputs (e.g. start of measurement, master measurement)
- 3 digital outputs for GO – NO GO – rework, measuring time
- Programmable analog output voltage ± 5 V
- Supplied with: Operating instructions and a mains power supply plug

Technical Data

Analog display	101 LED elements, 3 colors
Range and Text display	7 point LCD, 14 Segment, alphanumeric
Measured value display	7 point LCD, 7 Segments
Tolerance display	via color changes in the analog display
Display ranges	$\pm 10; 30; 100; 300; 1000; 3000; 10000 \mu\text{m}$ $\pm .0003; .001; .003; .01; .03; .1; .3 \text{ inch}$ or tolerance related
Meas. range inductive probe	4000 (± 2000) μm , resolution 0.1 μm $\pm .08''$, resolution $.000005''$ 400 (± 200) μm , resolution 0.01 μm $\pm .008''$, resolution $.000001''$
Response time	
- Meas. value memory	0.008 s
- Analog display	0.020 s
- Outputs	0.020 s

Error limits

- 10 x Analog display	1% (101 LEDs)
- Digital display	0.3% (min. 0.2 μm)
Temperature coefficient	$\pm 0.005\% / ^\circ\text{C}$
Operating temp. range	0 ... 45 $^\circ\text{C}$ / 32 $^\circ\text{F}$... 113 $^\circ\text{F}$

Interfaces

Computer, printer	RS232, 9 pin. male (PC-compatible layout)
- Control outputs	3 Optocoupler Outputs, 24 V, 100 mA
- Control inputs	3 Optocoupler Inputs, 24 V, 10 mA

Millimar X 1715 Intelligent measurement interface system

Features

Millimar X 1715 is a smart and universal measurement interface system for complex measuring tasks on the production floor. It is ideal as a signal transformer between sensors and the electronic measured data processing.

Functions

- Static and dynamic measurements
- Equation editor
- Definition of 16 features are possible
- One or two point master measurement

Connections

- 1 to 8 measuring device inputs
- RS-232 interface
- Analog output
- 3 digital inputs and 6 digital outputs
- Supplied with: Operating instructions, connection cable and a mains power supply plug

Technical Data

Measuring range inductive probe 4000 (± 2000) μm , $\pm .08''$
Resolution 0.1 μm , $.000005''$

Response time

- Meas. value memory 0.005s
- Outputs 0.020s

Error limits

- 0.3% (min. 0.2 μm)

Temperature coefficient $\pm 0.005\%/^{\circ}\text{C}$
Oper. temperature range $0^{\circ} \dots 50^{\circ}\text{C}$ / $32^{\circ} \text{F} \dots 122^{\circ} \text{F}$

Interfaces

- Computer, printer RS232, 9 pin interface (PC-compatible layout)
- Control outputs 6 Optocoupler-outputs, 24V, 100mA
- Control inputs 3 Optocoupler-inputs, 24V, 10mA

Analog output voltage	programmable
Power supply	90 V ... 264 V, 47Hz ... 63Hz
Power consumption	11 VA
Protection class	IP53 IP43 with conductive dust
Dimensions (H x B x D)	ca. 160 x 205 x 165 mm ca. 6.30" x 8.07" x 6.49"

Millimar X 1741 Intelligent measurement interface system

Features

Millimar X 1741. is a smart and universal measurement interface system for complex measuring tasks on the production floor. It is ideal as a signal transformer between sensors and the electronic measured data processing.

Functions

- Static and dynamic measurements
- Equation editor
- Definition of 16 features are possible
- One or two point master measurement

Connections

- 1 to 16 measuring device inputs
- RS-232 interface
- 2 analog outputs
- 6 digital inputs and 12 digital outputs
- Supplied with: Operating instructions, connection cable and a mains power supply plug

Technical Data

Measuring range inductive probe 4000 (± 2000) μm , $\pm .08''$
Resolution 0.1 μm , $.000005''$

Response time

- Meas. value memory 0.005s
- Outputs 0.020s

Error limits

Millimar Measuring Amplifier 1901 TA with analog output

M

Features

- The measuring amplifier 1901 TA is to be used in connection with an inductive probe for measurement control processes
- Provides the inductive probe with an AC voltage and converts the carrier frequency signal into output voltage
- Output voltage: ± 10 V (Option: ± 5 V / 0 V to 10 V) at the end of the measuring range
- Simultaneously the output signal current of ± 5 mA at the end of the measuring range is available
- Supply voltage 24 V=
- The housing of the 1901 TA is designed for use in the machine room
- Connections : 1 output for one Mahr compatible inductive probe
- Supplied with: 3 pin socket plug for analog output, 3 pin coupling bushing for power supply and operating instructions

Technical Data

Measuring ranges (adjustable through bridges)	$\pm 125 \mu\text{m}$ ($\pm .00492''$) $\pm 250 \mu\text{m}$ ($\pm .00984''$) $\pm 500 \mu\text{m}$ ($\pm .01968''$) $\pm 1000 \mu\text{m}$ ($\pm .03937''$) $\pm 2000 \mu\text{m}$ ($\pm .07874''$)	Connections	
		Input	5 pin socket
		Output	3 pin socket
		Supply	3 pin plug
Output voltage at end of measuring range	± 10 V	Response time	5-10 ms
Option:	± 5 V / $0-5$ V / $0-10$ V	Cut-off frequency	90 Hz
Current output at end of measuring range	± 5 mA	Protection class	IP 54
Linearity	$\pm 0.3\%$	Dimensions: (L x D x H)	43 x 100 x 170 mm (1.69" x 3.93" x 6.69")
Supply voltage	24 V =

Millimar G1275

VMT 6015

Description

With the measuring computer **Millimar G1275**, measuring results from multi-gaging units can easily be recorded and statistically evaluated.

The industrial housing makes the measuring computer suitable for use in the rough production area.

The compact dimensions of the housing allow for use of the computer in areas with little space.

The measuring results are clearly shown on the 15" TFT monitor, which avoids reading errors and misinterpretations.

Using the touchscreen, the measuring computer can be reliably operated in the production environment.

To record the measuring signals from the most different sensors, a broad spectrum of measuring interfaces can be connected to the measuring computer Millimar G1275.

Technical Data

Dimensions (LxDxH)	305 x 400 x 65 mm
Weight	4,3 kg
Material	Aluminum pressure die-cast powder-coated
Operating temperature	0 °C ... 55 °C / 32° F ... 131 F
Relative humidity	10 % to 85 % non-condensing
Protection class	IP65
TFT color monitor	15" 1024 x 768 pixel
Touch	Resistive industry touchscreen
Power supply	230 V ± 10 % AC / 24V DC (via external mains unit)

Interfaces

Inputs/Outputs	1 RS232 (COM1)
	1 input for keyboard/mouse
	2 Ethernet connection (RJ45)
	2 USB on the back side
	1 USB in the front panel

Software Millimar D1200X

Description

- Windows-based software
- ACCESS data bank
- Password protected menus and access authorization
- Free form editor
- Easy programming of the inspection plan by filling out masks
- Freely programmable calculation format
- Fast selection to display the measurements conducted
- Aid monitor for easy adjustment of sensors
- Calibration history is saved
- Measuring value display (numerical and as a bar graph)
- Measurement is saved (manually or automatically)
- Monitoring of the working range of the sensors and alarm
- Statistical evaluation of a measuring result
- Depiction as a histogram and SPC control card.
- Automatic calibration demand after hours and n measurements
- Inaccurate measuring values can be commented on with the reasons
- Statistical analysis
- Test of normal distribution
- Measurement systems analysis (R&R) and gage capability integrated
- Module to export in numerous data formats
- Interfaces to e.g. QDAS, SUMEQ, SESAME, QUASAR
- I/O interface for automatic control (option)
- Operation in automatic production lines with dialog control

Minimum Requirements

- Pentium IV or similar processor with at least 1.5 GHz
- Windows 2000 or Windows XP
- 20 GB free memory on the hard drive
- 512 MB RAM
- Monitor 1024 x 768
- Free USB interface
- CD drive
- 1 to 4 RS232 interfaces, depending upon the number of peripheral units

Millimar. Electronic Levels

OVERVIEW

Electronic Levels Applications

F

Measuring with a Mahr Federal Electronic Level is a relatively simple procedure. In a typical profile application, for example, measurements are made by moving the sensing heads in convenient increments along a straight path on the surface being checked. Comparative readings are taken at each increment.

Computer assisted models allow economical, fast, and error-free calculations to be made automatically. As prompted by the computer, the operator simply enters the value at each measurement point by pressing a hand-held switch. Depressing a computer key activates automatic analysis. Within moments, the results are displayed and printed, if desired, for permanent record.

Surface Deviation (Machine Tools)

The accuracy of machine tools begins with proper levelness plus the relationship between the ways and the table. These relationships are critical during the manufacturing process.

Once the level is zeroed, the instrument functions as a spirit level, and will check the overall levelness of the machine components to a very high degree of accuracy.

Shown here are just a few of the many surfaces that can be checked on a machine tool using the Electronic Level.

Differential Sensing

To aid in differential profiling applications, two level sensing heads, operating simultaneously with a single amplifier, are used. When the sensing heads are arranged for opposite response to a common motion (such as vibration or a shift in attitude of the object whose surfaces are being compared), they will ignore the common motion and respond only to changes which affect the

two heads differentially. A deviation of flatness, squareness, parallelism or alignment, therefore, can be accurately determined even though the object (such as a surface plate or a machine way) does not maintain constant orientation.

Surface Plate Flatness

The next progression in data collection is to combine and print a number of surface straightness checks onto a single chart. This is useful for checking the surface flatness of machine beds and surface plates.

Although the Moody Method for checking surface plates has been traditionally used to check flatness, the computer assisted digital Electronic Level System is ideally suited for highly precise profiling of surface plates and large machined surfaces while eliminating tedious and time-consuming data recording and calculations required by manual systems.

Determining surface flatness is accomplished by using a straight edge as a guide and moving the level along the edge.

Readings are recorded at convenient locations, and entered into the computer via handswitch to produce the surface profile.

Machine Tool Evaluation

ANSI Standard B5.54, for machining center evaluation, refers to levels as an important part of machine evaluation, calling out angular deviation as a major contributor to machine tool errors.

Electronic Levels are ideal for monitoring such deviations as pitch, yaw and roll.

When used with the Spindle Mount Attachment (EAT-1062), levels become an essential tool towards total Machine Tool Evaluation.

Electronic Levels

F

Offer fast response, fine resolution and excellent repeatability

Features

- Used to determine any deviation in the right angle relationship between a horizontal surface and the earth's gravitational force (usually expressed as an angular or linear deviation from absolute level).
- Show any change in this relationship over time.
- Compare the orientation attitude of separate or adjacent horizontal surfaces.
- Show any change in this comparison over time.
- Level systems are angular-linear compatible.
- Sensing heads are interchangeable with Mahr Federal's gage heads to accommodate linear measurements.
- Fast Response: quick response to slight angular changes permit taking fast and accurate measurements at various sensing head positions or taking dynamic position readings.
- Resolution/Repeatability: Mahr Federal's Electronic Levels far exceed the sensitivity and accuracy of precision spirit levels with a resolution to 6 μ in per foot (.1 arc second), compared to the spirit level's resolution of .0001" per foot. With repeatability at ± 1 arc second, Electronic Levels are ideal for ultra-high resolution profiling.
- Direct Dimensional Readout: multiplier feature permits operator to view displacement caused by the angular measurement of the level head; this is displayed as an inches per foot readout rather than arc seconds: eliminates readout confusion when switching from spirit levels to electronic levels.
- Angular-Linear Compatible: sensing heads are easily interchangeable with Federal gage heads to accommodate linear measurements.
- Operator Friendly: Level systems are often compared to the autocollimator or laser calibration systems. In each case, the measurement technique is basically the same. Electronic Levels, however, are much easier to set up and operate. Results are obtained cost-effectively without requiring time consuming sight path alignments. There are no optical surfaces to keep clean, and the Level does not need a turbulence-free environment to achieve accurate readings.

How they work

As shown in the figure, our Sensing Head operates on the pendulum principle, with a pendulum supported by two reed springs attached to an extension block at the top of the Sensing Head housing.

Tilting the head causes a change in the position of the pendulum's shading loop in relation to the center leg of the core. This produces an electrical imbalance in the amount of flux passing through the two secondary coils, delivering a signal proportional to the displacement of the pendulum.

This is displayed on a Mahr Federal amplifier meter which is graduated in seconds of arc.

Electronic Levels Ordering Information

Differential Level System

The Differential Level System operates simultaneously with a single amplifier, permitting an immediate comparison between two surfaces.

Adjustable bases permit setup on surfaces that are out-of-level or square by as much as $\pm 1.5^\circ$.

Each system includes:

- 832 F Amplifier with power module and storage case
- 2 EGH-2013-W2 Electronic Level Heads with 6m / 20ft cables
- 2 EAT-1029 Adjustable Bases
- ECB-1871 Remote data enter handswitch with 6m / 20ft cable

Automatic Profiling System

Ideally suited for highly precise profiles of surface plate and large machine surfaces, eliminating tedious and time-consuming data recording and calculating required by manual systems.

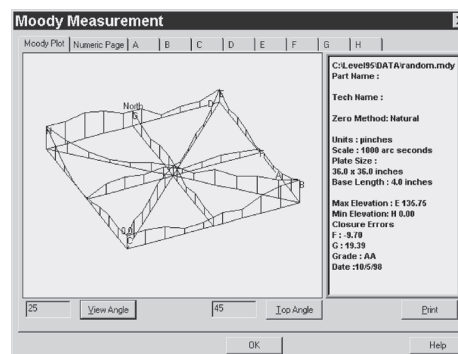

Each system includes:

- 832 F Amplifier with power module and storage case
- 2 EGH-2013-W2 Electronic Level Heads with 6m/20ft cables
- 2 EAT-1029 Adjustable Bases
- ECB-1871 Remote data enter handswitch with 6m/20ft cable
- 7024634 RS-232 0.6 m/4 ft interconnect cable, 9 pin-9 pin
- Notebook computer (EAS-2836) with notebook printer (ERO-1063) and cable (ECB-1775)
- Mahr Federal Profiling Software (EDD-1035) for single line profile measurements and Moody Method surface plate profiling. Includes 3 data outputs (printout of data point readings, numeric and isometric plots of surface plate readings)
- Serial - USB Adaptor

Surface Plate Certification Software

- Moody and Profile Analysis
- Isometric or numeric plots
- Automatic grading according to industry standards
- On-line help
- Flexible path sequence and orientation

**EAT-1029
(Adjustable Leveling Foot)**

The adjustable level foot mounts to the base of the level head. Typically used to assist in leveling the head to its true zero position.

**EAT-1054
(Magnetic Base)**

Incorporates a magnet to fix it in position, providing stability when mounted on a moving carriage.

**EAT-1055
(Vee Base)**

Has a 120° Vee precision ground into the 102 mm / 4" base for measuring the straightness or alignment of cylindrical surfaces.

**EAT-1056
(Right Angle Attachment)**

Has two 152 mm / 6" surfaces, accurately ground to 90°, to simplify measuring flatness on horizontal or vertical and cylindrical surfaces. Each adjacent pair of faces is square to within 0.5 μm / 25 μin. Attachment includes 120° Vee face, which is parallel to its base to the same limit.

**EAT-1057
(Adjustable Base)**

A three-pad base lets you adjust the distance between the pads from 50 mm / 2" to 203 mm / 8" when using the "Grid" or "Union Jack" measuring methods. Can also be used for straightness movement checks.

**EAT-1062
(Spindle Block)**

A special spindle mounting block to hold the level head in a horizontal or vertical spindle. Utilizes a 19 mm / .750" bar for mounting and allowing checking angular motion on a machine tool per B5.54 Calibration Standard.

**EAT-1061
(29.5mm/11.625in Base)**

Has a 29.5 mm / 11.625" ground, flat surface for leveling machine beds and ways. It also has a 120° Vee ground into the base, permitting the base to be positioned on a cylindrical surface. When coupled with an 832 or 830 Electronic Amplifier while in the inch mode, it can display inches/feet as a direct reading.

**EAT-1058 (50 mm / 2")
EAT-1059 (102 mm / 4")
EAT-1060 (152 mm / 6")**

A three-pad base which provides the flexibility to maximize data accumulation for surface plate calibration. Available in three pad spacing sizes.

Millimar. Air Gage Metrology

PRECISION BEGINS AT THE START OF THE MEASURING PROCESS

► | High pressure air gages measure dimension deviations quickly and precisely. For years, they have proven themselves as high quality pneumatic length measuring units in industrial production and measuring rooms. Air measuring value recorders such as jet air probes, jet air plug gages, jet air ring gages, air caliper gages, angularity plug gages, angularity measuring rings and measuring units for mating parts determine the measuring value without contact. The measuring values of one or several air measuring value recorders are displayed by the Millimar evaluation units according to the principle of determination of changes in air pressure. | ◀

Millimar. Air Gage Metrology

Metrological features

Millimar evaluation units work according to the principle of determination of changes in air pressure; the pressure differential between two chambers is measured. While one of the two chambers provides a constant reference pressure, the pressure of the other chamber (measuring chamber) is determined by the distance of the measuring jet of an air measuring value recorder to the test specimen.

Millimar evaluation units have two connection points that are each directly connected to one of the two pressure chambers. Thus the measuring value is measured directly without any conversion via a Piezo pressure sensor and is then digitalized.

Magnifications from 2500:1 to 10000:1 are realized with exchangeable instrument jets.

Millimar measuring units must be supplied with constant air pressure through a pressure reducing valve. Measuring units with pressure reducing valves can be connected to all compressed air lines from 3.5 bar to 10 bar overpressure, whereby an air filter should be interconnected.

The air must be dry and oil-free.

Metrological features

- Universal, reliable, proven, especially high-performing
- All measuring methods, individual, total and differential measurements
- High accuracy, long-term stability, insensitive to environmental influences
- Up to 10000x magnification of the measuring values, large measuring ranges
- High measuring accuracy and reproducibility for the measuring results: depending upon the magnification 0.5 μm to 20 μm
- Contact-free measurements with measuring jets, no damage to the workpieces
- Reliable measurements of even uncleaned, oiled, lubricated workpieces, or workpieces with lapping paste. Measuring points are cleaned by the measuring air
- Linear display of the measuring values on a clear, large or long scale, easy and error-free reading of measuring results
- Measurement of diameters, distance between holes, tapers, excentricities, alignment of bores, mating measurements etc.
- Various measuring possibilities due to the corresponding adaption to existing measuring problems
- Airgage display unit for all applications
- Requires little room, handy, easy to use, all measuring methods
- Fully automatically working electrical units for measuring, control and sorting processes
- Measurement control unit for production machines
- **Millimar** single and multi-column units to set-up complete testing control units
- Multi-column units according to the modular construction system due to close arrangement of the measuring columns and long scales
- Versatile measuring elements: jet air probes, jet air plugs gage, jet air ring gages, air caliper gages, angularity plug gages, angularity measuring rings, taper jet plug gages, taper jet ring gages and measuring units for mating parts for contact-free measurement
- Unusually long life-time of the air measuring elements
- Robust model for the shop floor. Models for all applications.
- Special models for special tasks

General Technical Data of Air Gages

Air gaging is a measuring system that uses air pressure to determine the size of measured part. The relationship between air pressure and distance of a restriction (workpiece) to the air escape (jets) can be plotted on a graph (line a).

As the distance between jets and work surface increases, the pressure decreases and the ratio becomes linear as represented by the straight section "B". This straight portion of the curve can be accurately calibrated, and represents the scale of the Dimensionair. Compare its length with "C" on the other curve, which is the usable portion of other air gage scales. This longer linear scale gives the Dimensionair its longer usable measuring range.

Millimar. Air Evaluation Units

MEASURING COMPLEX TASKS TO THE POINT

► | Evaluation instruments have many different applications and therefore need to meet a broad range of requirements. They can perform anything from simple measurements on the shop floor to complex applications with a whole host of test features in fully automated production lines. These applications require high levels of reliability and precision combined with straightforward operation. Millimar evaluation instruments meet these requirements perfectly. Robust, compact, bright light-strip instruments, measurement interfaces for a wide range of applications and easy-to-use measuring computers can all be adapted for different probes and tailored to suit your particular application. | ◀

Dimensionair® Air Gages (single master system)

F

Features

- Uses regular shop air (40 - 150 psig).
- Internal pressure regulator keeps measuring pressures within calibrated range.
- Adjust meter to zero using a single setting master and the zero setting screw.
- High visibility meter has fine line graduations and a needle-thin hand for clear, precise readings. An air filter is included to remove dust and dirt contaminants from air line.
- Tooling mounts to the front of the unit. Connections are tight with finger pressure.
- No recalibration necessary when changing tooling. Just set zero and measure!
- Models available in 5 magnifications, 2 dial styles, and either Metric or Inch.

Dimensionair® Air Gages (single or dual master system)

F

Each Universal Dimensionair is furnished with an adaptor (for connecting standard Mahr Federal air tooling) Optional adaptors are available for virtually any air tooling application.

Features

- Uses regular shop air (40 -150 psig).
- Internal pressure regulators and differential meter assure ultimate stability over full operating range.
- Adjust span and zero setting to tune the gaging range to the interchangeable dial ranges.
- Interchangeable dials provide an easy, inexpensive means to accommodate various ranges
- High visibility meter has fine line graduations and a needle thin hand for clear, precise readings.
- An air filter is included to remove dust and dirt contaminants from airline.
- Tooling mounts to the front of the unit. Adaptors are available for virtually any tooling configuration.

μDimensionair® II Air Gages (single or dual master system)

F

The μDimensionair is the ultimate of portability and versatility — in your hand or at the workbench or machine tool. Shown with optional 2239307 Bench Kit

All parts of the μDimensionair are completely interchangeable and included with the gaging system — versatility is built-in.

All μDimensionair gages are supplied with output capability.

Features

- **Affordable**
 - **Versatile**
 - **Innovative**
 - **Rugged**
- No other air gaging system offers so much — in the palm of your hand — mounted to the workbench or even right to the machine tool. μDimensionair is rated IP54, so, it can be used on the shop floor — and, the air tooling cleans dirt from the part for high performance measurements — fast and easy!
 - Air gage readout is right in front of you — simple and clear.
 - Fixed resolution and balanced air system makes the gage stable and reliable for your manufacturing environment.

μDimensionair II offers:

- Single and Min/Max mastering selectable
- All other features of the μMaxum II Digital Indicator:
 - Dynamic Mode operation: Min, Max, TIR
 - Multiplier factor and hold function
 - Data output with selectable serial number
 - MarConnect data output: USB, OPTO RS232C, Digimatic

Versatility

The ultimate in configuration — interchangeable handle allows for pistol grip or normal end-mount for easy application of the plug to the part. For large, heavy plugs, mount the handle between the tooling and the display — assures a well-balanced, ergonomic measuring system. Can also be mounted to a bench stand when parts are brought to the gage.

Accessories

Bench stand provides safe and secure μDimensionair storage between measurements.

Order no. 2241109

Slide valve controls air to tooling — saves cost of wasted air, reduces air noise.

Order no. 2240993

Swivel coupling allows for rotating tooling to fully explore bore.

Order no. 2240594

For applications where the local elevation is greater than 305m / 1000 feet, special calibration is required.

832 Dimensionair® Air Gaging (Zero master system)

F

Features

- Digital and analog displays in a single unit. Large, high contrast digital readout shows exact deviation from zero; analog display shows measurement conditions at a glance
- Fixed resolution and balanced air system makes the Digital Dimensionair a stable and reliable system for manufacturing environments.
- Only a single master required to set zero; system is precalibrated for correct magnification
- Ranges and resolutions for virtually any air gage application, including 2-, 3-, 4- and 6-jet tooling plus AirProbes and JetProbes.
- Dynamics measurement capability
- RS-232 Output – for communicating with a data collector, computer or printer, permitting statistical process control
- Master Deviation – enhances measurement by making Auto Zero even more accurate.

Technical Data

Model	Measuring Range	Digital Resolution	Analog Resolution	Tooling I.D. Number
Low Magnification Single or Dual Input	±0.080 mm / ± .003"	0.0002 mm / 10μ"	0.004 mm / 150μ"	60
	±0.040 mm / ± .0015"		0.002 mm / 75μ"	50
	±0.020 mm / ± .00075"		0.001 mm / 38μ"	20

Connection cable (9 pin D-Sub jack to D-Sub jack), length 3 m	7024634
Control unit with 3 push buttons	5318430
Footswitch for Millimar for	
Input 1	5330955
Input 2	5330956
Input 3	5330957
Air Supply Adaptor Kit	2121236

Features

Functions

- Favorites, using the SELECT button, frequently required settings can be directly called up
- Static measurements $\pm A$, $\pm B$ and all combinations
- Dynamic measurements: Max, Min, Max-Min, Max+Min, mean value
- Auto-detect mode. Two measuring devices can be connected (probe, plug gage. . .) - the measuring device used is automatically shown on the display
- 1 point or 2 point master measurements
- Programmable via built-in keypad or RS232 interface via MS-Windows configuration software D10005

Display

- Backlit LCD display with scale display and two-line digital display
- 5 three-colored status lamps for warning and tolerance limits
- Up to 2 features can be displayed at the same time

Connections

- One input for pneumatic measuring devices (optionally compatible to PE systems from Mahr or Mahr Federal)
- RS232 interface
- Three digital inputs for measuring start, master measurements, sending measuring value, . . .
- Three digital outputs for GO, NO-GO, rework, measuring time, . . .

Technical Data

Display	Backlit LCD display 115 mm x 70 mm
Analog scale	Indicator, 61 graduation
Range and text display	Characters LCD, 5 x 7, Dot matrix, alpha numerical

Measured value display	7 digit LCD, 7 segments
Tolerance display	5 LEDs, 3 colors
Display ranges	$\pm 3, 10, 30, 100, 300, 1000, 3000, 10000 \mu\text{m}$ $\pm 0.0001, 0.0003; 0.001; 0.003; 0.01;$ $0.03; 0.1; 0.3 \text{ inch}$ or tolerance related

Measuring range / resolution (tooling dependant)	
2500:1	100 (± 50) μm / 0.1 μm
5000:1	50 (± 25) μm / 0.1 μm
10000:1	25 (± 12.5) μm / 0.1 μm

Error limits

10 x analog display	2 % (51 pixel)
Digital display	0.05 %
Temperature coefficient	$\pm 0.005 \text{ } ^\circ\text{C}$
Operating temp. range	0 $^\circ\text{C}$ to 45 $^\circ\text{C}$

Interfaces

Computer, printer	RS232, 9 pin, male (PC compatible configuration)
Control inputs	3 opto-coupler outputs, 24 V, 10 mA 24 V, 100 mA
Control outputs	3 opto-coupler inputs, 24 V, 100 mA 24V, 10 mA
Current supply	100 V to 240 V,
Mains unit	47 Hz to 63 Hz
Power consumption	10 VA
Protection class	IP53 with conductive dust IP43
Housing dimensions (H x W x D)	ca. 205 x 160 x 165 mm
Weight	ca. 2.1 kg

Millimar C 1245 PE Flexible length measuring unit for versatile tasks (single or dual master system)

Features

Display

- Analog indicator instrument for measuring value display
- Two-line LCD display to display the measuring value and help texts
- 5-color status lamps for warning and tolerance limits
- Up to 3 features can be shown simultaneously

Functions

- 16 characters can be defined
- With an equation editor (80 characters) input channels C1 to C8 are mathematically linked with factors and brackets using the 4 basic mathematical functions
- Static measurements: current value, square root, arc tangent
- Dynamic measurements: Max, Min, Max-Min, Max+Min, mean values
- Statistical functions: n, x-bar S, Xmax, Xmin, R
- Measuring value memory for 5000 measuring values
- Measuring Start / Stop via keyboard, digital input, RS232

Connections

- 2 input modules can be used in the basis unit
- RS232 interface
- 1 analog output
- 3 digital inputs for measuring start, master measurement / zeroing, sending data
- 6 digital outputs for GO, NO-GO, rework, collective goods, measuring time, 4 classes, BCD interface

Model types

			Order no.

Digital display	0.05 %

Temperature coefficient	$\pm 0.005 \text{ \%}/^{\circ}\text{C}$
Operating temp. range	0 $^{\circ}\text{C}$ to 45 $^{\circ}\text{C}$

Interfaces

Computer, printer	RS232, 9 pin, male (PC compatible configuration)
Control inputs	6 opto-coupler outputs, 24 V, 10 mA, 10 mA 24 V, 100 mA
Control outputs	3 opto-coupler inputs, 24 V, 100 mA
Current supply	90 V to 264 V,
Mains unit	47 Hz to 63 Hz
Power consumption	11 VA
Protection class	IP53 with conductive dust IP43
Housing dimensions (H x W x D)	ca. 205 x 160 x 165 mm
Weight	ca. 2.2 kg

Millimar S 1840 PE Length measuring instrument with three-color illuminated bar graph (single or dual master system)

Features

Assess and judge measuring results at a glance – nothing is easier than that with the Millimar S 1840 column amplifier. For measurements with air measuring devices

The Millimar S 1840 column amplifier offers a broad range of functions for combining the signals from both static and dynamic measurements.

Measuring results are indicated by way of 101 three-color LEDs. When the programmable warning and tolerance limits are exceeded, the LEDs change their color from green to yellow or red, accordingly – high visibility from any distance.

Display

- Easy to read 3-color illuminated bar graph with analog warning and tolerance limit display
- Backlit, two-line LCD for the display of measuring values, help tests and units of measurement
- Up to two characteristics can be displayed simultaneously.

Connections

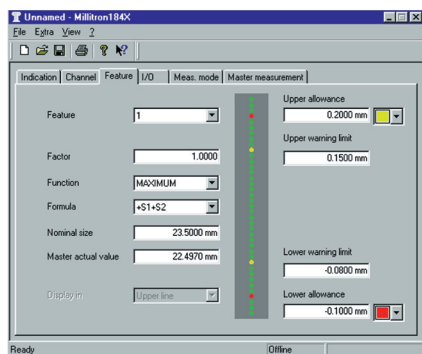

- Single input.
- RS 232 interface.
- Analog output.
- Three digital inputs for measuring start, master measurement, etc.
- Three digital outputs for Accept – Reject – Rework classification, measuring time, etc.

Functions

- Dynamic measurements: Max, Min, Max-Min, Max+Min, mean.
- Windows® software for configuring the LED display The Millimar S 1840 column amplifier can be programmed either menu-guided via the integrated membrane keypad or with the provided Microsoft Windows® configuration software.
- Single Master or Dual Master setup.
- Password lockout in Setup Mode.

- Supplied with:
Mains power supply plug

Configuration Software

The Millimar S 1840 column amplifier can be programmed either menu-guided via the integrated membrane keypad or with the provided Microsoft Windows® configuration software.

Millimar. Air Gages

PRECISION BEGINS AT THE START OF THE MEASURING PROCESS

► I Air gages use the measuring effect of the change in pressure when a workpiece approaches a measuring jet. As the distance between jets and work surface decreases, the pressure increases while the velocity of flow and the respective volume flow decrease. The air measuring procedure has a relatively short but very linear measuring range. I ◀

1. Thickness or wall thickness measurements with jet air gage
2. Diameter measurement of cylindrical through bores with jet air plug gage.
3. Diameter measurement of cylindrical blind bores with jet air plug gage. 4. Diameter measurement of cylindrical through bores with ball contact plug gage
5. Diameter measurement of cylindrical blind bores with lever contact plug gage
6. Diameter and thickness measurement with adjustable jet air caliper gage
7. Straightness measurement of a cylindrical bore with special jet air plug gage
8. Mating measurement between bore and shaft with jet air plug gage and jet air ring gage
9. Taper-pitch measurement of an inside taper with taper jet air plug gage measurement as per the differential measuring method
10. Measurement of a perpendicular position of a cylindrical bore to the front face with a special jet air plug gage measurement as per the differential measuring method
11. Measurement of hole distances of separated cylindrical bores with jet air plug gage measurement as per the differential measuring method
12. Measurement of hole distances of truncated cylindrical bores with jet air plug gages measurement as per the differential measuring method
13. Taper-pitch measurement as well as diameter measurement of an inside taper with taper jet air plug gage.
14. Multiple inside and outside measurements with measuring jet air gages and contact probes in connection with a seven-column unit.
15. Multiple inside and outside measurements with measuring jet air gages and contact probes in connection with a seven-column unit.

Dimensionair® Air Gages – Air Plugs

Features

- **Calibrated I.D. tooling for the Dimensionair® Air Gaging Systems**
- Tooling is interchangeable without adjusting system magnification.
- Federal Air Plugs have large clearance (see table below), allowing easy entrance into the hole being measured and greater measuring range.
- Long life - wide clearance and hard chrome (optional) body extends useful life of the Air Plug.
- Deep, recessed jets - Air jets are recessed into the plug body which protects them from damage.
- Large jet size eliminates clogging from dirt and oils..

Plug identification

Air Plugs are marked with an identification number which identifies its size, number of jets, plug style, and the Dimensionair® Model the plug should be used with.

For example: **DP50-T2-1.000** is the identification number of an Air Plug for a **2095184** or a standard magnification 832 Dimensionair (DP50), through-hole style with two jets (-T2), and 25mm/1.000" nominal size (-1.000).

The number (50) which identifies the Dimensionair intended is marked on the plug and also appears on the dial of the Dimensionair to help in matching the tooling to its corresponding Dimensionair Model.

Identification	Nominal Size from		To & include		Clearance from Nominal Size

Ordering Information

When ordering Air Plugs please specify:

1. Nominal I.D. Size and Tolerance.
2. Dimensionair Model to be used.
3. Air Plug style (Through Hole, Blind Hole, or Counterbore).
4. Air Plug finish (Chrome-plated or Hardened Steel).
5. Order Master Setting Ring at same time.

Unless otherwise specified, Mahr Federal will furnish a 2-jet, Through Hole, High Chrome Air Plug for a 2500:1 Dimensionair.

Through Hole and Blind Hole Air Plugs

Through Hole Plugs (DP50 - DP20 & 60)

3.12-4.70 mm / .123-.185"

Minimum recommended hole length: 4.75 mm / **.187"**

14.94-19.05 mm / .588-.750"

Minimum recommended hole length: 6.35 mm / **.250"**

With guide sleeve or stop collar: 1.8 mm / **.070"**

May be used with AHA-4 or -5 Extensions for deep holes.

4.70-6.30 mm / .185-.248"

Minimum recommended hole length: 4.75 mm / **.187"**

19.05-37.69 mm / .750-1.484"

Minimum recommended hole length: 6.35 mm / **.250"**

With guide sleeve or stop collar: 1.8 mm / **.070"**

May be used with AHA-4 or -5 Extensions for deep holes.

6.30-9.49 mm / .248-.3735"

Minimum recommended hole length: 6.35 mm / **.250"**

With guide sleeve or stop collar: 1.8 mm / **.070"**

37.69-76.30 mm / 1.484-3.004"

Minimum recommended hole length: 6.35 mm / **.250"**

With guide sleeve or stop collar: 1.8 mm / **.070"**

May be used with AHA-4 or -5 Extensions for deep holes.

9.49-14.94 mm / .3735-.588"

Minimum recommended hole length: 6.35 mm / **.250"**

With guide sleeve or stop collar: 1.8 mm / **.070"**

May be used with AEX-1 or -2 Extensions for deep holes.

76.30-114.30 mm / 3.004-4.500"

Minimum recommended hole length: 6.35 mm / **.250"**

With guide sleeve or stop collar: 1.8 mm / **.070"**

* If a guide sleeve or stop collar is used, minimum hole length can be as small as 1.78 mm / .070" for holes larger than 6.30 mm / .248".

** A handle 152 mm / 6" long and 33.3 mm / 1.31" diameter is supplied with plugs over 76.5 mm / 3.004".

Blind Hole/Counterbore Plugs (DP50 - DP20 & 60)

3.94-4.7 mm / .155-.185"

Minimum recommended hole length: 6.35 mm / **.250"**
Note: Masters must simulate workpiece for holes of this size.

11.86-14.94 mm / .467-.588"

Minimum recommended hole length: 6.35 mm / **.250"**
Shorter bores can be checked. Consult Mahr Federal Customer Resource Center. May be used with Extensions AEX-1 or -2 for deep holes.

4.7-6.30 mm / .185-.248"

Minimum recommended hole length: 6.35 mm / **.250"**

14.94-37.69 mm / .588-1.484"

Minimum recommended hole length: 6.35 mm / **.250"**
Shorter bores can be checked. Consult Mahr Federal Customer Resource Center. May be used with AHA-4 or -5 Extensions for deep holes.

6.30-9.49 mm / .248-.3735"

Minimum recommended hole length: 6.35 mm / **.250"**
Shorter bores can be checked. Consult Mahr Federal Customer Resource Center.

37.69-76.30 mm / 1.484-3.004"

Minimum recommended hole length: 6.35 mm / **.250"**
Shorter bores can be checked. Consult Mahr Federal Customer Resource Center. May be used with AHA-4 or -5 Extensions for deep holes.

9.49-11.86 mm / .3735-.467"

Minimum recommended hole length: 6.35 mm / **.250"**. Shorter bores can be checked. Consult Mahr Federal Customer Resource Center. May be used with Extension AHA-28 for deep holes.

76.30-114.30 mm / 3.004-4.50"

Minimum recommended hole length: 6.35 mm / **.250"**.

Super Blind Plugs

Blind Hole Air Plugs can be furnished to check shorter holes than listed above and can be furnished to check closer to the bottom of a hole. Holes must be at least 2.79mm/.110" long, and the distance from the end of the plug to the center-line of the jets can be as short as 2.16mm/.085" for plugs below 6.3mm/.248" or 1.90mm/.075" for plugs above 6.3mm/.248"

Notes:

* If a guide sleeve or stop collar is used, minimum hole length can be as small as 3.18 mm/.125"

** A handle 152 mm/6" long and 33.3 mm/1.31" diameter is supplied with plugs over 76.3 mm/3.004". For smaller or larger plugs than those shown above, or for any modification to the specifications shown, contact Mahr Federal Customer Resource Center.

Air Gaging Instruments

Accessories

Handles and Extensions

When an Air Plug is used with a hose, it should be equipped with a Handle to avoid excessive strain on the air connection and corrosion on the polished plug body. Handles may be combined for gaging deep holes.

Selection of a handle or extension is determined by the bore itself and whether or not it is preceded by a larger C-bored diameter. Corresponding thread sizes of the handle or extension must also be considered.

If no portion of the handle or extension enters the part, only thread sizes must be considered. If the plug does enter the part, then both O.D. and thread size must be considered.

2202010 and 2202011 Extensions — accept 2202074 Hose on one end and the following plug sizes on the opposite end: all 1250:1 thru 8000:1 plugs up to 76.3 mm / **3.004"**.

2202012 Handle — accepts 2202074 Hose on one end and the following plug sizes on the opposite end: all 1250:1 thru 8000:1 plugs up to 76.3 mm / **3.004"**. Has Bakelite insulating cover. Recommended for 37.7 mm / **1.484"** up to 76.3 mm / **3.004"** diameters.

2237666 — High impact and coolant resistant, light weight composite handle — normally furnished with μ Dimensionair and air snaps.

2202012 and 2236070 — light weight aluminum handles without or with air shutoff valve.

Order no.	Thread	O.D.		Length	
		mm	inch	mm	inch
2202010	3/8-32	12.07	.475"	102	4"

* Use on 2204599

2202003 Handle — Used and furnished with 1250:1 thru 8000:1 through or blind hole plugs over 76.3 mm / **3.004"**.

2202007 and 2202008 Handles — Used with 10000:1 thru 32000:1 plugs.

2202009 Handle — Used with 2500:1 thru 8000:1 blind hole plugs in the 9.47 mm / **.3735"** to 11.8 mm / **.467"** range, using an 2201588 Adaptor.

2201954 and 2201963 Extensions — Used with 2500:1 thru 8000:1 through hole air plugs in the 9.47 mm / **.3735"** to 14.93 mm / **.588"** range and with 11.8 mm / **.467"** to 14.93 mm / **.588"** range blind hole plugs, using an 2201601 Adaptor.

2201975 — extension used with 2204599 adjustable base. Provides easily configured base for bench-mounted air tooling fixturing. See Dimetron Plugs (Chapter 9. MaraMeter).

Accessory Configuration for DP60/DP50/DP20 Systems — Low Magnification

Accessories for High Magnification Systems — DP10/DP5

Dimensionair® Air Rings

Air rings are supplied in several styles for external measuring. Two and three jet rings are most common, used for checking outside diameters for sizes out of round conditions from 6.3 mm / .248" to 63.5 mm / 2.500". Four and six jet rings are also available for special applications. All Air Rings have chrome-plated wear surfaces unless otherwise specified.

Jet air ring gage with 2 measuring jets

Jet air ring gage with 3 measuring jets

For applications where O.D.'s need to be checked near a shoulder, or where part length is restricted, contact Mahr Federal for technical assistance about shoulder and Snout Type Air Rings.

Counterbore Type

Shoulder Type
(for 2500:1 & 4000:1
5000:1 & 8000:1 only)

Snout Types

Technical Data

Diameter d		Diameter D		Width B	
mm	inch	mm	inch	mm	inch
6.3-7.6	.248-.299"	76.2	3.00"	25.4	1.00"
7.6-9.3	.299-.366"	76.2	3.00"	25.4	1.00"
9.3-13.0	.366-.512"	76.2	3.00"	25.4	1.00"
13.0-21.0	.512-.827"	76.2	3.00"	25.4	1.00"
21.0-25.4	.827-1.00"	76.2	3.00"	25.4	1.00"
25.4-38.4	1.00-1.51"	101.6	4.00"	25.4	1.00"
38.4-44.5	1.41-1.75"	101.6	4.00"	25.4	1.00"
44.5-50.8	1.75-2.00"	127.0	5.00"	25.4	1.00"
50.8-63.5	2.00-2.50"	127.0	5.00"	25.4	1.00"
63.5-76.2	2.50-3.00"	139.7	5.50"	25.4	1.00"

When ordering ring gages, please specify the following:

- Nominal workpiece dimensions
- Tolerance
- Desired magnification
- Instrument used
- Setting plug to be supplied?

Air Rings may be attached directly to a Dimensionair or used on a base and connected to the gage with a plastic hose. Vee type Guide Chutes can be furnished on one or both sides if Air Rings from 6.3 mm / .248" through 44.5 mm / 1.750". Tube type guide can be furnished on sizes from 6.3 mm / .248" through 63.5 mm / 2.500".

Dimensionair® Air Rings

Options for Air Rings

Carbide Wear strips

Air plugs are normally furnished chromed for long life. Other materials can be provided to improve the life of the ring when high volume or grinding grit may still remain on the part. Materials such as Ferrotic and addition of carbide strips can be provided.

Bases for air rings

Depending on the application there are many ways to hold an air ring. They may be hand held and placed over the part if the part is still on the machine. They may be front mounted, horizontally or vertically on the Dimensionair or for larger parts the can be mounted to a base and held vertically or horizontally.

Special bases are available the mount the ring horizontally and incorporate a part lifting mechanism to aid in part removal.

Guide chutes

Guide chutes and vees are available in a host of options to improve the inspection process. Vee type guide chutes can be furnished on one or both sides of an air ring from 6.3 mm / **.248"** through 44.5 mm / **1.75"**. Other options include tube type guide chutes for sizes 6.3 mm / **.248"** through 63.5 mm / **2.5"**.

Standard length of the guide chutes are 63.5 mm / **2.5"** and affix to the side of the air ring. Normal length of the chute is 63.5 mm / **2.5"**. Other options including heavy duty out riggers and universal vee stands can be provided.

Options for Air Snaps

Since side clearances can present gaging problems with crankshaft diameters or similar applications, Mahr Federal designed a new line of air snaps that make the tough measurements easier and affordable.

We based our new air snap design on our own proven air tooling techniques, known for providing long life and high-resolution in tough shop environments. Now you can measure fixed sizes from 12.5 mm / **.49"** through 184 mm / **7.25"** using D-2500 and D-5000 systems. Widths are typically 19 mm / **.75"** but can be customized to reach diameters having tight clearances.

Jet locations can be located central in the snap or positioned close to either side for exploring close to a shoulder.

Multiple circuit air snaps are available for speeding the process while checking the journal for size variation, taper, barrel or hourglass shape.

Dimensionair® Air Gages

AirProbes and JetProbes

- AirProbes and JetProbes provide modular, convenient gage heads for use in hand-held gages and for designing into fixture gages.
- 9.5 mm / **.375"** bodies provide standardized mounting configurations.
- Compact size allows easy access to hard-to-reach dimensions.
- AirProbes and JetProbes are calibrated for instant use with Dimensionair® systems - just set zero and measure!
- Available in single-probe and matched-probe configurations.

**AA-1-3 AirProbe and AAT-19
JetProbe Assembly**

AirProbes

For use where contact-type measurement is required with 2500:1 Dimensionair Systems. AirProbes are available in Regular Action (counter-clockwise meter movement when spindle is depressed) or Reverse Action (clockwise meter movement when spindle is depressed) and in various ranges. When used with Model 2500:1 Dimensionair, the Meter Dial must be specified to match the

AirProbe range (see table below). AirProbe and Dial are color coded - just match the color band on the AirProbe to the colored dot on the Dial to be sure that the AirProbe range matches the readout on the Dimensionair. AirProbes are provided with AAD-55 Straight Adaptor for attaching to Air Hoses.

Order no.	Range		Style / Color Code***	Matching Dial Model		Graduations	
	mm	inch		inch	metric	µm	inch
AA-1-3*	0.076	.003"	Regular / Red	ADL-28**	ADL-95**	1	.00005"
AA-2-3*	0.076	.003"	Reverse / Red	ADL-28**	ADL-95**	1	.00005"
AA-1-6	0.152	.006"	Regular / Green	ADL-16	ADL-96	2	.0001"
AA-2-6	0.152	.006"	Reverse / Green	ADL-16	ADL-96	2	.0001"
AA-1-30	0.762	.030"	Regular / Blue	ADL-24	ADL-98	10	.0005"
AA-2-30	0.762	.030"	Reverse / Blue	ADL-24	ADL-98	10	.0005"

* **.003" Range AirProbes can also be used with 5000:1 Dimensionairs, but the working range is reduced to .0015".**

** **These dials are the same as normally supplied on 2500:1 Dimensionairs, except for the color code.**

*** **Regular AirProbes have single color band; reverse AirProbes have double color band.**

AirProbes can be supplied in matched pairs, either two Regular Action AirProbes or one Regular and one Reverse Action AirProbe. Contact Mahr Federal Customer Resource Center to specify.

AirProbes JetProbes

JetProbes are similar to AirProbes, except they have an open jet at the end, instead of a contacting spindle. JetProbes are ideal for measuring flatness of surfaces which cannot be touched, or for building into fixture designs where air gaging is called for. JetProbes can be used with 2500:1, 5000:1 Dimensionairs, and are supplied

singly or in matched pairs. **Order no. AAT-19** for single JetProbe or **AAT-20** for a matched pair. JetProbes are supplied with AHO-1 Air Hose, a zero setting valve, and hardware for mounting to the Dimensionair.

Air Gaging Accessories

Magnification Kits

Magnification Kits provide a means for checking Amplifier accuracy, traceable to the National Institute of Standards and Technology (NIST). Each Kit contains restrictors that provide pressure characteristics at zero and at both ends of the scale, a calibrated dial diagram and a Certification of Calibration.

Order no.	For use with:	Tooling
AMR-SPEC-136	1250:1	DP/DR100
2094182	1260:1	DP/DR60
AMR-12	2500:1/4000:1	DP/DR50
AMR-13	5000:1/8000:1	DP/DR20
AMR-14	10000:1/16000:1	DP/DR10
AMR-15	20000:1/32000:1	DP/DR5

AMR-12

Manifolds

Manifolds allow connecting multiple pieces of air tooling to one Dimensionair. Toggle valves allow activation of the selected tool. Manifolds are compatible with Dimensionairs 1250:1 through 8000:1M Manifolds for use with other Dimensionairs, contact Mahr Federal Customer Resource Center — **1-800-333-4243**.

Order no.	Description
2248282	2-way Manifold
2248283	3-way Manifold
2248284	4-way Manifold
2248285	5-way Manifold

Manifold 2248283

Hoses

Supply hoses and hoses between Dimensionair and air tooling.

Order no.	Description	Thread
AHO-2	1.5 m / 5 ft Air Supply Hose. Fits all Dimensionair models. (rubber)	7/16-20
AHO-1	0.9 m / 3 ft Air hose for tooling for Models 1250:1 – 8000:1. (Tygon)	3/8-32
AHO-8	1.5 m / 5 ft Air hose for tooling on Models 1250:1 – 8000:1. (Tygon)	3/8-32
AHO-10	1.8 m / 6 ft Air hose for Models 1250:1 – 8000:1. (Tygon)	3/8-32
AHO-20	0.9 m / 3 ft Air hose for tooling on Models 10000:1 – 32000:1. (Tygon)	9/32-40
ARG-1	Replacement O-ring for AHO-1, -8, -10 Hoses and AHA-4, -5, -6, -20 Handles.	
ARG-6	Replacement O-ring for AHO-20 Hose, AHA-23 and -24 Handles.	
ARG-10	For AEX-1, AEX-2 and AHA-28	

Traps and Filters

Good gaging practice requires clean, dry air for gage performance. Dimensionair Models are furnished with a particle filter. Shop air contains water and oil, which should be removed, using Model **AFL-24** Oil and Water Separator Trap.

Order no.	Description
AFL-10	Particle Filter (normally furnished on all Dimensionair Models). Filter size: 5 microns; Maximum pressure: 250 p.s.i.; maximum working temperature: 175°F.
AFL-24	Oil and Water Separator Trap, includes mounting hardware. Filtering capacity: 99.7% removal of oil and water; filter size: 3-6 microns; maximum pressure: 150 p.s.i.; flow rate: 20 cubic feet of air/minute @ 80 p.s.i.
AFL-23	Replacement cartridge for AFL-24.
AFL-21	Replacement cartridge for AFL-10.

AFL-24 Trap

Millimar. Standard Elements

Modular

The use of **Millimar** standard elements allows multi-gage measuring devices to be designed and implemented for the widest possible range of workpieces, e.g. rotationally symmetrical and non-rotationally symmetrical parts.

Rotationally symmetrical workpieces can be mounted between centers or on prismatic supports, whereas non-rotationally symmetrical workpieces often require a special holder.

Versatile

The versatility of the **Millimar** standard elements means that the right solution can be provided, whatever the measurement task at hand.

Whether it's a question of external, internal or length measurements, the **Millimar** standard elements will be able to meet your requirements, even in the case of complex workpiece geometries.

Thanks to the space-saving design of the styli, a high number of measuring points can be inspected within a small area of the testpiece.

The pneumatic lifting mechanisms integrated into the measuring elements simplify the job of moving the testpiece into the measuring position and reduce the amount of wear on the styli.

Flexible

The modular concept using **Millimar** standard elements is continued throughout the construction of the whole system. A generous amount of travel in the styli (up to 20 mm / 0.79") allows a high degree of flexibility in terms of the variety of testpieces that can be accommodated.

Precise

The **Millimar** standard elements are specially designed for use in the workshop and are manufactured using a rigorous process. This guarantees that the measuring devices give stable and reliable measurements.

For example, using styli fitted with two ball-bearing guides for supporting the moving part, it is possible to achieve measurement accuracy at the μm scale, if this is required due to the tolerances of the feature being measured.

Reliable

All components are long-lasting and low-maintenance thanks to the use of rust-proof materials, the selection of appropriate heat treatments, and the use of a lifting mechanism to minimize the effects of friction acting on the styli when the workpiece is inserted.

Economical

Our systems can either be constructed by the customer from standard elements obtained from the catalogue, or alternatively we can provide ready-built devices as turn-key solutions. Whichever option you choose, you can be sure that you are purchasing a system that is tailored to your specific requirements on the most favorable of terms.

Below are just a few examples of the many factors that contribute to the cost effectiveness of the **Millimar** standard elements:

- Reusability of standard elements: Once manufacture of a particular type of workpiece has ceased, all standard elements used in the test equipment can be reused for a different type of workpiece.
- A choice of different mechanisms for guiding the moving part of the stylus, according to the accuracy requirements of the measuring task (optimal price-performance ratio).
- Reduction in development and implementation time.
- Availability of the equipment: Our standard elements are manufactured under standard production conditions and are always available off the shelf and ready to use.
